<https://www.linkedin.com/in/dilshan-nadeeranga-206a342b6/>

Passionate Software Engineer with 1 year of industry experience and currently pursuing a BSc in Software Engineering at SLIIT. I specialize in Full-Stack development, with a proven track record of building scalable web and mobile applications using JavaScript (React, Node.js), Java, and Python. I thrive on solving real-world problems through creative engineering and am committed to bridging the gap between academic theory and high-quality enterprise solutions. I am eager to contribute my technical skills and collaborative mindset to a forward-thinking development team.

Skills

- .Net framework and .Net Core, C#
- MS SQL, MySQL, Oracle
- Firebase, MongoDB, PostgreSQL
- ASP.NET – MVC
- MERN - MVC & Microservices
- Docker, Azure Kubernetes
- Kotlin, Android Studio
- HTML, JavaScript, Python, PHP, TypeScript, CSS, Tailwind
- Android Studio, VS code, GitHub
- Full Stack, DevOps, Agile, OOP, SOLID
- Project Management
- Team Collaboration
- Effective Communication
- Problem Solving
- Working multiple cultures
- Time Management
- Critical Thinking

Education

March 2023 - Present	BSc. (Hons) Information Technology specializing in Software Engineering Sri Lanka Institute of Information Technology , Malabe [https://www.sliit.lk/]
May 2024 - Present	B.Sc. (Hons) Engineering Technology Specialized in Mechanical & Manufacturing Technology Wayamba University of Sri Lanka [https://wyb.ac.lk/]
Oct 2020	Assured Diploma in Information Technology ESOFT [https://esoft.lk/]

Certificate in Kubernetes Administrator (**CKA**) - Udemy | 2025

Certificate in Kubernetes Certified Application Developer (**CKAD**) - Udemy | Ongoing

Certificate in **Java** - Udemy | 2025

Certificate in **MongoDB (C#, Node.js, Java, Python, PHP)** - MongoDB | 2025

Experience

2025 August - Present

Software Engineer | Invert Code [<https://www.invertcode.com/>]

- Re-engineered legacy React JSX applications, improving code structure, performance, and maintainability.
- Developed a TypeScript-based Restaurant Management System (RMS) with modern frontend architecture and reusable components.
- Built an AI-powered interview management platform (Orbit) featuring candidate evaluation, interview workflows, and automated assessment support.
- Developed an Appointment Management System using JavaScript for scheduling, tracking, and managing appointments efficiently.
- Utilized modern web development practices, version control, debugging, and testing throughout the software development lifecycle.
- Collaborated with developers, project managers, and stakeholders in agile development environments.

Projects [<https://github.com/Dilshan-Nadeeranga>]

• FEB 2026 - JUL 2026 **AI-Enabled Smart Healthcare Platform**

Developed a microservices-based healthcare platform enabling appointment booking, telemedicine, secure medical record management, and online payments. Integrated AI-powered assistance, real-time video consultations, automated notifications, and scalable role-based access control for patients, doctors, and administrators.

Tech Stack: React.js, Vite, Node.js, Express.js, MongoDB Atlas, Docker, Docker Compose, JWT Authentication, Cloudinary, Stripe, PayHere, Helakuru, Agora RTC, Google Gemini API, Brevo SMTP, Twilio, Microservices Architecture.

• AUG 2025 - JAN 2026 **FarmLink – Smart Agricultural Supply Chain Platform**

Developed a Flutter-based mobile application that connects farmers, distributors, transporters, and consumers through crop auctions, logistics management, and real-time tracking. Features include multilingual support, GPS-enabled delivery management, weather insights, push notifications, and secure cloud-based data management.

Tech Stack: Flutter, Dart, Firebase Authentication, Cloud Firestore, Firebase Storage, Firebase Cloud Functions (Node.js/TypeScript), Firebase Cloud Messaging, Google Maps Platform (Maps SDK, Geocoding API, Directions API), OpenWeatherMap API, Git, Android Studio.

• FEB 2025 - JUL 2025 **Safari Booking Management System**

Developed a full-stack web application using the MERN stack and RESTful APIs for managing safari bookings, including AI-based trip planning, user subscriptions, vehicle scheduling, booking management, and secure payments.

Tech Stack : MERN (React.js, Node.js, MongoDB, Express.js, Stripe API)

• NOV 2024 - JAN 2025 **Boarding House Management System**

Built a web-based system to manage room allocations, tenant records, rent tracking, and maintenance requests, improving operational efficiency using a full-stack development approach.

Tech Stack : MERN (React.js, Node.js, MongoDB, Express.js)
